

Love Nebo? You'll really love Nebo Tracker!

Completely automated. Low-cost. Reliable.

Nebo Tracker is a small GPS device with cellular connectivity, that completely removes the human factor from voyage logging.

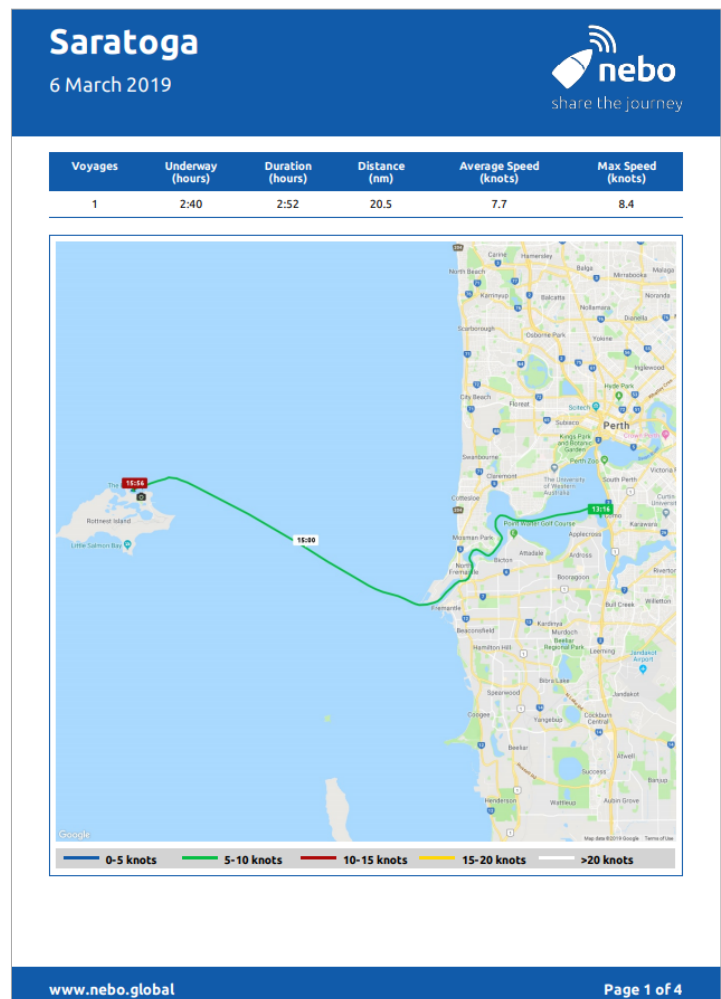

When your boat moves, a voyage is logged. Period.

With **Nebo Tracker** on board, you can still use the Nebo app to keep in touch with other skippers and to stay safe on the water, but your voyage is logged independently of your phone or tablet.

If your phone runs out of battery or data, relax. Your voyage is being logged by **Nebo Tracker**.

In fact, you can leave your phone in your pocket.

Nebo Tracker comes with a pre-installed SIM for cellular connection, and the low-cost subscription includes all data charges.

You can get your Nebo Tracker right now at shop.nebo.global
